Apps Deal Programs: AVP & Accelerators

November 2020

PRIVILEGED AND
CONFIDENTIAL

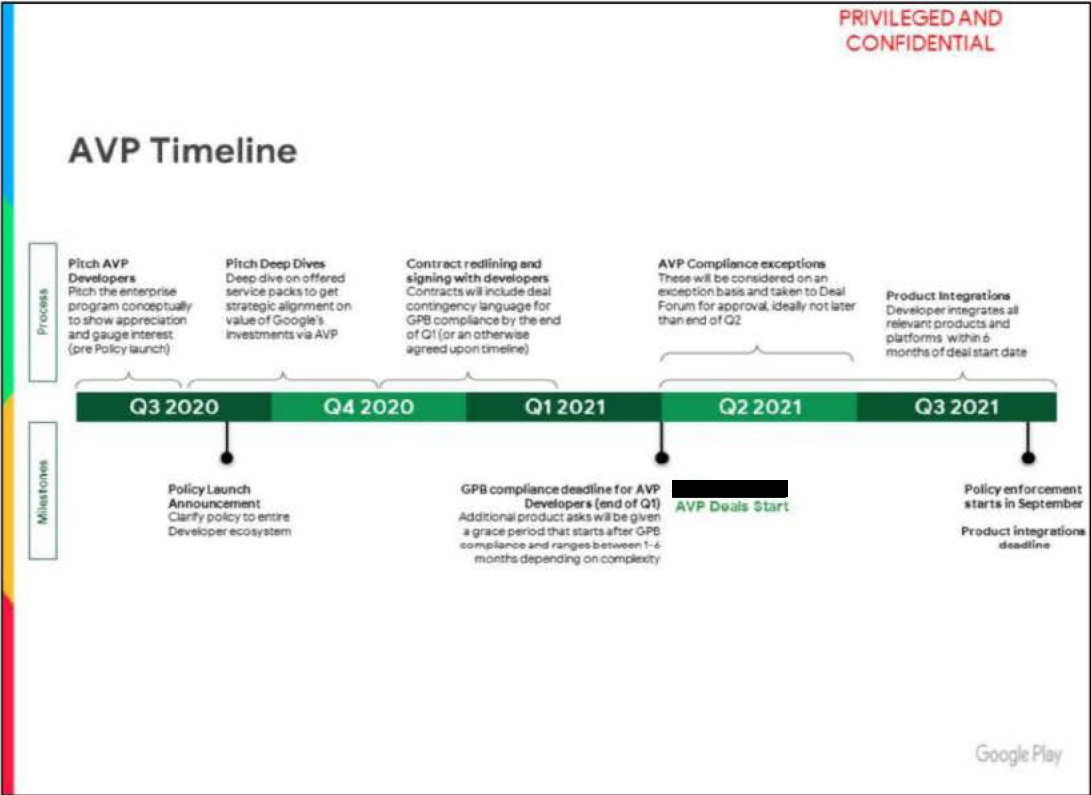

Overview

- AVP was approved for delivery in 2021-2023; required Devs to be GPB compliant by EOY 2020
- Given the delay in policy announcement, we've pushed the AVP compliance deadline to EOQ1 2021
 - Any exceptions to be approved at Play BD deal forum; only allows extension until EOQ2 2021 else deal offer expires
- **AVP deal & incentives will kick in post GPB compliance**; developers will have **up to 6 months to post deal start date to complete product integrations** stipulated in AVP contracts
 - Any exceptions to be approved at Play BD deal forum; only allows extension by 3 months else deal terminates

Developer Obligations	Deadline	What if Developers miss this deadline?
GPB Compliance	End of Q1	Extend upto 1 month post deal forum approval If extended deadline not met, the deal is terminated
Product Integrations	Once a Developer is compliant both their deal becomes active and they will have 6 months to complete product integrations	Extend upto 3 months post deal forum approval If extended deadline not met, the deal is terminated

1	11/11/2020 06:44:02	+1 - will suggest we align as a working group first. Agree on need to shorten and combine as a next step
2	11/11/2020 06:44:47	If this ends up going to exec audience, suggested alternative presentation for whole slide: Timeline like on next slide but requirements on top and benefits on bottom ? Or perhaps combining with next slide?

3	11/11/2020 06:46:47	@dmartinak@google.com Should this not just be "6 months post deal start date"? That implies the developer is compliant. @osalva@google.com _Assigned to Danielle Martinak_
1	11/11/2020 16:28:54	How are we messaging this as a "hard deadline"? will they not get access to AVP if they miss it?
1	11/11/2020 16:28:54	Correct, we've said we have budget approved for this time period and will otherwise have to consider other Developers etc

4	11/06/2020 16:54:38	Is this needed in the context of this discussion (timelines/teeth/stick)?
2	11/06/2020 16:54:38	I think it's helpful to see how flexible we're being with Developers. I know Sarah wanted some comparisons for Match.
2	11/06/2020 22:36:56	Added [REDACTED] to this list
3	11/11/2020 16:32:54	This is % reinvested right? Let's be super clear - right now it sounds like this is the effective service fee.
3	11/11/2020 16:32:54	Agree this has been confusing in meetings, "effective deal %" is representative of deal size... how much the deal is of consumer spend but we should align on terminology

AVP & Accelerator Comparison

	AVP	Accelerator (LRAP, ADAP)
Description	Deals offered to partners with sizable Google business to deepen partnership and improve sentiment around Play value proposition	Deals offered to verticals that are margin constrained due to content acquisition costs based on principle that all verticals should be able to succeed on Play
Background	New program (2020)	Old programs (2015)
Google commitments	Cloud credits, Ad credits, Promos and Points, DMF	Service fee reduction
Developer obligations	GPB, product integrations, parity	GPB, product integrations, parity
When Google commitments start	GPB compliance (EOQ1) without product integrations (done within 6 months)	Date when GPB compliance and product integrations are completed

Commercial exchange for AVP & Accelerators begin based on different deadlines, linked to value exchange:

- AVP offers early commercial incentives as devs co-invest in xPA simultaneously
- Accelerator incentives begin post integrations as that is when Google begins to accrue (and hence share) value

Match	Group	[REDACTED]	Meeting June 2021

PRIVILEGED & CONFIDENTIAL: Internal Briefing Document
 daniellestein@ covering for bbarras@

WHO YOU'RE MEETING WITH

Gary Swidler. Serves as COO and CFO of Match Group, where he oversees finance, accounting, tax, treasury, strategy, corporate development, investor relations as well as corporate communications, ad sales, user privacy, safety and data security. Gary joined Match Group in 2015 as CFO, just prior to the completion of the Company's IPO in November of 2015.

You last met in October 2020 (briefing) to reiterate to Gary that [REDACTED]

OBJECTIVES

- Reiterate spirit & [REDACTED]
- Draw hard lines on demands Match has identified as deal [REDACTED]
[REDACTED]
- Aim to understand Match's next steps: [REDACTED]
- Listen to Gary's feedback/concerns - identify areas that we may need to address further.

DESIRED OUTCOME

While either of the following outcomes are acceptable, our bias is the former:

- [REDACTED]
- [REDACTED] continue to work cooperatively towards completing a smooth GPB integration across all their properties by policy deadline (9/30)

As this is your first conversation since the Senate Hearing, here are additional/related FAQs should these questions come up

- **You know we're still going to continue our outreach to Senators and regulators? Does that affect the deal?**
 - No, those activities do not affect our deal. Match, like any developer, has the right to provide feedback to us and engage with the political process. We are still focused on crafting a win-win [REDACTED]
- **Do you think Google/Play's ----- practice/policy is fair (or competitive)?**
 - Yes, we think so. Our practices/policies are focused on delivering the best possible service for the largest number of developers and consumers.
- **Don't you think this is anti-competitive or unfair?**
 - We value Match's feedback but respectfully disagree with your characterization of Google Play's policies.
- **Are you pressuring us on this unreasonable clause because of our comment at the Senate hearing?**
 - We are negotiating in good faith, based on what is best for our business.

Where we are...putting ourselves in Match's shoes

- **What Match ultimately wants:**
 - To be able to tell their investors that their P&L is stable
 - To pay less than 30% (have [REDACTED])
 - Indifferent to whether it occurs via a public ecosystem-wide change or a private deal

Match's options/strategy (from their POV)

- **Match's view of Play's strategy:** Play's strategy is probably to "make Match whole" for policy change via private deal, so they don't have to disrupt ecosystem with a business model change
- **Match's strategy:**
 - Push hard for desired outcome - perhaps Match will get it
 - Stretch time as long as possible
